What is the DO Difference?

There are two types of physicians in the United States: DOs and MDs. Both are fully qualified physicians licensed to prescribe medication and perform surgery. While DOs and MDs have many commonalities, Osteopathic medicine has a distinct philosophy and approach to patient care. DOs bring an extra dimension to health care through their unique skills.

- DOs practice a **“whole person”** approach to medicine. Instead of just treating you for specific symptoms or illnesses, they regard your body as an integrated whole
- **Osteopathic physicians** focus on preventative health care
- **Osteopathic manipulative treatment (OMT)** is incorporated into the training and practice of osteopathic physicians. With OMT, osteopathic physicians use their hands to diagnose illness and injury and to encourage the patient’s body’s natural tendency toward good health. By combining all other available medical options with OMT, DOs offer their patients the most comprehensive care available in medicine today.

Why Exhibit or Sponsor

DOs represent the busiest offices and see more patients than their MD counterparts. Some of our past exhibitors have said, “Interaction with Licensed DOs was fantastic”, “There was such a broad range of medical disciplines including OB/Gyn, Cardiology, Dermatology and Endocrinology”, “Great networking events in the exhibit hall”. We invite you to showcase your company by participating as an exhibitor and/or sponsor at the one conference that will bring together the best of the best in a medical arena.

About the TOMA Convention

The 2022 Convention will celebrate TOMA’s 124th convention. It will attract physicians, nurse practitioners, physician assistants, other medical providers, and medical professionals from a variety of disciplines. The conference will be hosted at the Marriott Knoxville Downtown, in Knoxville, TN.
